MASTER OF SCIENCE IN SUSTAINABLE FOOD PRODUCTION SYSTEMS

STEPS project is co-funded by ERASMUS+ PROGRAM, Key Action – 2 Cooperation for innovation and the exchange of good practices -Capacity Building in the field of higher education

The main goal of STEPS project goal is the implementation of a Master of Science in "Sustainable Food Production Systems" in High Education Institution of Western Balkans Countries, Albania, Kosovo, and Bosnia & Herzegovina.

STEPS master program has gained significant attention to the students because:

- ❖ The courses contents are designed to meet food market demands in Western Balkans
- ❖ The curriculum was designed based on best practices of High Education Institution of EU
- ❖ The master's courses introduce for the first time the concept of sustainability in the entire food chain
- ❖ Students exchange possibilities within HEIs of WB where the STEPS master is implemented and HEIs in EU
